

Meritec CE Marking Statement

Date: 6/30/2015

The CE Marking of products is a declaration that the item meets the requirements of the EU Directive(s) applicable to the product. Finished goods manufacturers wishing to market their products in the European Union are responsible for ensuring their products have been assessed and pass legislative requirements prior to affixing the CE Mark.

Meritec understands that the RoHS II Directive 2011/65/EU is a CE Marking Directive and applies to all finished electrical and electronic equipment (EEE) that is dependent on electric current or electromagnetic fields for at least one intended function. Only finished goods covered in the scope of RoHS II can bear the CE Mark. As a component manufacturer, Meritec does not supply CE Marking for components. However, RoHS II information is available on request to assist finished goods manufacturers in complying with applicable CE Marking Directives.

If you require further assistance regarding compliance of Meritec products, please contact Jaimie Costello at jcostello@meritec.com.

Sincerely,

Jaimie Costello
