

## Meritec RoHS 2

Date: 5/1/2015

The Restriction of Hazardous Substances (RoHS 2) Directive 2011/65/EU limits the amounts of Lead (Pb), Mercury (Hg), Cadmium (Cd), Hexavalent Chromium [Cr (VI)], Polybrominated Biphenyls (PBB), and Polybrominated Diphenyl Ethers (PBDE) that may be used in a product. Meritec is well aware of the substance restrictions set forth by the RoHS Directive and has been working with our Suppliers to ensure that we meet Customer requirements for RoHS Compliance.

Our Compliance Department is constantly working to maintain a database of RoHS compliant parts. Currently, a large majority of Meritec parts do not contain any of the RoHS restricted substances above the set limits.

If you require information on a particular part number, requests can be made to [info@meritec.com](mailto:info@meritec.com). Please be aware that the only way we can certify a part's RoHS Compliance is evaluating the content of finished parts.

Sincerely,

Jaimie Costello

Product Compliance Assistant
