

QUALITY ENGINEER

Dynamic, DIB (Defense/Medical Industry Base designated) “Essential”, High-tech firm in growth mode looking to fill full-time position for Quality Engineer Team Member.

The Quality Engineer will act as a liaison between quality, manufacturing, and engineering to facilitate a smooth translation of requirements from product development engineering to manufacturing and quality control.

ESSENTIAL DUTIES AND RESPONSIBILITIES

Work with design engineering to develop and implement;

- Product quality plans
- Process FMEAs (PFMEA) that correlate with DFMEAs
- Critical to Process (CTP) (pre-production and production) parameters and control plans
- Establish Critical to Quality (CTQ) parameters
- Manufacturing and assembly process flows and control plans
- Material, tooling and test/measurement specifications
- Process and work instructions
- Packaging specifications
- Inspection criteria
- Assist with prototype builds
- Assist with design verification and validation activities
- Perform Sample and First Article Inspections
- Initiate improvement activities using Six Sigma Concepts and Statistical Process Control (SPC) Measurements

SUPERVISORY RESPONSIBILITIES

May occasionally directly supervise 1-2 technicians on a temporary, project basis.

SUPERVISION RECEIVED

- Supervision and guidance related to overall objectives, critical issues, new concepts and policy matters.
- Report to and Consults with Quality Manager concerning unusual problems and developments.

EDUCATION and/or EXPERIENCE

- IPC Class 3 Knowledge and Experience essential
- ISO 9001:2015 knowledge and auditing experience. Considered a plus: ISO 13485 and AS9100 knowledge and experience.
- Experience in The Cable and Connector Industry preferred; i.e., Aerospace, Military, and/or Medical Device experience a plus.

LANGUAGE SKILLS

- Ability to read, analyze, and interpret general business periodicals, professional journals, Technical Procedures and governmental regulations.
- Ability to write reports, business correspondence, and procedure manuals.
- Ability to effectively present information and respond to questions from groups of managers, clients, Customers

REASONING and OTHER ABILITIES

- Ability to define problems, collect data, establish facts, and draw valid conclusions.
- Ability to interpret customer requirements, through technical and procedural documents.
- Ability to effectively communicate ideas, concepts, and procedures to all levels within the organization, from Co-workers on the shop floor to peers on cross-functional teams
- Familiar with standard concepts, practices, and procedures within engineering field.
- Ability to manage multiple projects and excellent time management skills
- Self-motivated, innovative, creative, and resourceful
